4R carbon finance framework methodology

- Engagement with stakeholders within the landscape partnership for carbon project development (Stakeholder mapping)

- Mapping of possible carbon initiatives in the landscape
- Implementation of Carbon Quick Scan

- A vision is established on how land restoration could look like and with what possible carbon projects
- Feasibility studies

- Project design (PDD)
- Landscape GHG Guidance – for initiating multiple projects within a landscape, employing a “Decision Tree” for methodology selection under the VCS Standard

- MRV
- Guide on Responsible Use of Carbon Credits - detailed strategies for mobilizing buyers and avoiding greenwashing
